XSYS

Regulatory Information

We support you in the recycling of Electrical and Electronic Equipment (EEE)

Recycling of Waste of Electrical and Electronic Equipment (WEEE) is a specialist part of the waste and recycling industry, helping to save natural resources and protect the environment.

Unwanted electrical equipment is the UK's fastest growing waste stream. If not recycled, electrical parts and equipment will end up in landfill.

XSYS is pleased to offer its customers in the UK the possibility to recycle their electrical and electronic equipment purchased from XSYS, when purchasing a new equipment from us. Thus, we support you by collecting the old electrical and electronic equipment (EEE) which has reached its end of life. The marking with a crossed-out wheeled bin symbol reminds that old electrical equipment can be recycled and shall not be disposed in the household waste.

Please speak to your usual sales contact for details on how to request a collection of your old EEE. Please remove any batteries from the old EEE prior to collection.

Thank you for your continued trust in XSYS.

XSYS Prepress NV
UK WEEE-Reg. No. WEE/MM3135AA

XSYS Germany GmbH
UK WEEE-Reg. No. WEE/MM8636AA
